Ceres is the home design for those looking to indulge in an authentic holiday everyday lifestyle. Waking up in your upstairs master suite, homeowners can step straight out on to their own balcony, where you can take in the magnificent views. Relaxation will come easy, as you lay back in your chic round bath that features in the opulent and spacious ensuite bathroom. This master suite is a true sanctuary. There's no doubting this home design was developed with space in mind - from the welcoming open-plan living areas to the convenient downstairs guest bedroom/ensuite bathroom combination. There's also a double garage that offers not just space for two vehicles and your golf car, but also a dedicated workshop area as well. Ceres ticks so many boxes.
